

WHY GET INVOLVED IN THE DOING RESEARCH PROGRAM?

Because you can ...

Join the international 'Doing Research' community

Map your country's research system

Create local ownership of development research and empower local researchers

Help to reform national research policy

Mainstream findings on local development priorities

Influence development policy uptake

Generate awareness about a research systems approach

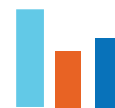

Grow your (peer) networks in your country through the mapping of research actors

Benchmark research systems for customized international comparisons

Produce high-quality evidence and metrics

Create an enabling environment for the local implementation of the Sustainable Development Goals
