

Researchers

Abdi Yuya Ahmad is a Lecturer at Adama Science and Technology University, Ethiopia and currently a Postdoctoral student at Aalborg University, Denmark. He has earned his PhD in innovation economics from Aalborg University, Denmark, and has studied Masters of Science in Economic Policy Analysis at Addis Ababa University, Faculty of Business and Economics. His area of research interest includes innovation, firm level learning and local capability building towards sustainable industrialization in Africa. He is actively engaged in evaluating the impacts of industrial policies and technology transfer from FDI in Ethiopia. He has previously worked as a junior lecturer at public service college of Oromia (currently Oromia State University), researcher at Oromia Anti-Corruption Commission and lectures at Arsi University.

Franklin Amuakwa-Mensah, a Ghanaian citizen, is currently employed as a post-doctoral researcher at the Department of Economics, Swedish University of Agricultural Sciences (SLU) in Uppsala. Amuakwa-Mensah received his PhD degree in economics from SLU. He holds MPhil degree in Economics and BA degree in Economics with Mathematics, all from the University of Ghana (UG). Prior to joining SLU, Franklin held various positions at the Institute of Statistical, Social and Economic Research (ISSER), Department of Economics (UG) and Ashesi University College in Ghana. His areas of research include environmental and natural resource economics, development economics, agricultural economics, impact evaluation, behavioral and experiment, energy economics, efficiency analysis, banking institutions analysis, among others. Amuakwa-Mensah has published his research works in a number of reputable journals. He has taught various subjects in economics both at undergraduate and graduate levels. He has also supervised both undergraduate and graduate students.

Laura Nelima Barasa holds a PhD in Economics from the department of Economics and Business Economics, Radboud University Nijmegen, Netherlands. She holds a master's degree from the University of Nairobi, Kenya. Barasa is also a CPA graduate. She is currently a lecturer at the University of Nairobi's School of Economics, teaching Econometrics, Elements of Economics, and Institutional Economics. Barasa's research interests revolve around a range of topics including innovation, agriculture, poverty, and education in low income countries. Barasa has published in leading journals such as Research Policy. Barasa is also affiliated to the African Economic Research Consortium (AERC) and Partnership for Economic Policy (PEP). She is also a member of the African Network for Internationalization of Education (ANIE).

Edgar Francis Cooke is a lecturer in the Business Department at Ashesi University College in Ghana. He teaches microeconomics, macroeconomics and international trade and policy to undergraduate students in his institution. His principal research interests are in the areas of poverty, inequality, economic growth and international trade. He is also interested in the application of microeconomic and macroeconomic methods and tools in studying interesting research questions in his areas of interest. Cooke received his bachelor's and MPhil degrees in economics from University of Ghana, a masters in international economics, and doctorate from the University of Sussex.

Hamidou Jawara is a final year PhD candidate in Quantitative Economics at the University of Kiel in Germany. He also holds a teaching position at the University of The Gambia. Before the start of his doctoral studies, he has taught economics courses such as introduction to econometrics, principles of micro and macroeconomics, and maths for Business and Economics to the undergraduate students of the university. Through his doctoral program, he has developed a strong passion for research in development economics and applied microeconomics. Consequently, most of his research work now focuses on microcredit lending, financial inclusion, and food security in developing countries. Also, he has a keen interest in and passion for program evaluation. Currently, he has a research project with the Partnership for Economic Policy (PEP) on mobile money and transaction cost in the Gambia.

Gilles Quentin Kane is a PhD student at the Faculty of Economics and Management of the University of Yaound-II, Cameroon, under the Collaborative PhD Programme (CPP) of the African Economic Research Consortium (AERC). He holds an MSc in Agricultural and Environmental Economics from the University of Yaound-II. He has won several awards, including the Partnership for Economic Policy PMMA - Microeconomic analysis Research Grant (PMMA-12880) 2015-2017, African Economic Research Consortium (AERC) grant for doctoral studies (2012-2017), Scholarship to pursue MPhil studies from the Inter-University Post-Graduate Program in Economics (NPTCI) from 2008 to 2010, the British American Tobacco (BAT-CEMAC) Grant for Excellence (2005-2007) and the Ministry of Higher Education Grant for Excellence (2007). In 2015, he was PhD Research Intern at the United Nations University UNU-WIDER (Helsinki). He has published in academic journals such as Review of Development Economics, Economics Bulletin, Poverty & Public Policy and Journal of Food, Agriculture and Environment. He is specialized in Agricultural and Development Economics. His research interests include impact evaluation, agricultural market and price analysis, food and nutrition security, gender and poverty analysis.

Timothy Kinoti has for the past 10 years been working in evaluation, monitoring and research, and is currently the Evaluation & Learning Manager at World University Service of Canada. Having led teams that had local and international members in both the public and private sectors, records track his leadership in over 28 counties in Kenya and internationally. His professional journey began back in 2003 when he enrolled for his Bachelor of Arts degree at the University of Nairobi. Fully aware of his career goals, he later took up professional courses in data, its analysis and management in various institutions, among them the USAID Global Health E-learning and Karolinska Institute. Between 2009 and 2016, he boosted his career by learning Advocacy at AMREF Health Africa and exploring development at the World Bank E-Institute. He later took up a strategic management course and a myriad of other leadership courses, at various institutions, among them RTI University, Marketing Society of Kenya and the World Bank. Kinoti joined the Kenya Institute of Public Policy Research & Analysis (KIPPRA) in 2009 as a research assistant. This marked the advancement of his career and interest in economic development, public policy and development evaluation, after which he joined the National Research, Monitoring & Evaluation team at the National Coordinating Agency for Population & Development (NCPD), AMREF Health Africa, Research Triangle Institute (RTI) to his current position. Through his journey, he has worked as a lead consultant with such institutions as PricewaterhouseCoppers among other. Kinoti's vision is a world where development work will be informed by rigorous evidence through contextually appropriate methodologies. He is keen on development finance subject and how different investment vehicles are used to impact change in African countries. He is pursuing a PhD in Development Studies with research emphasis on Development Finance.

Sied Hassen Mohamed (PhD) is Research Fellow at the Environment and Climate Research Center (ECRC) in the Ethiopian Development Research Institute (EDRI). He leads the center's Sustainable Energy Transition research theme. He holds a PhD in Economics from the University of Gothenburg in 2015. His research works emphasize the application of microeconometrics and experimental economics to energy and agricultural economics. Mohamed has published in reputable international journals such as Energy Economics, Energy and Resource Economics, Energy policy and others.

Soazic Elise Wang Sonne is a fellow in the Innovation, Economics and Governance for Development (IEGD) PhD Program of the United Nations University (UNU-MERIT) in Maastricht, the Netherlands. She holds a double engineering degree in Statistics and Applied Economics (Ingenieur Statisticien Economiste) and MSc in program evaluation and sustainable development funded by the UK Chevening Cameroon Women Scholarship. Soazic is a 2018 World Bank Africa fellow and a visiting scholar at the University of California Berkeley BITSS-CEGA. She also previously served as a research fellow for the New York University (NYU)-Global TIES for children and the United Nations Economic Commission for Africa (UNECA) and has consultancy positions with the United Nations University-World Institute for Development Economics Research (UNU-WIDER) and the World Bank Social Protection and Labor division. She was a former intern within the economics division of the French Ministry of Economy and Finance-Central Africa region. Sonne's research interests lie at the intersection of applied impact evaluation on health, education, agriculture and gender in conflict and post-conflict affected countries in Sub Saharan Africa. She is interested in understanding the long-term consequences of violent conflict and forced displacement on household welfare and in identifying which development interventions work, how and under what conditions. Sonne is a strong advocate of research transparency and reproducibility in Social Sciences and her work as a catalyst across the US, Europe, and Africa has been rewarded by the 2017 UC Berkeley Leamer-Rosenthal Prize in the category of Emerging Researcher.

Muhammed A. Usman is an Ethiopian citizen. He has been working as a Postdoctoral Researcher Fellow at the Center for Development Research (ZEF), University of Bonn, where he holds his doctoral degree in Agricultural Sciences. He holds a double Master's degree within the Erasmus Munds Programme in Agriculture, Food and Environmental Policy Analysis (AFEPA). He obtained an MSc in Economics from Swedish University of Agricultural Sciences and MSc in Food and Resource Economics from the University of Bonn in 2012. Usman obtained his Bachelor degree in Economics from Hwassa University, Ethiopia, 2006. Before moving to Sweden for his graduate study, Usman also worked as a planning officer at the Ethio-telecom company from 2006-2010. Usman's research interest lies at the intersection of rural water supply, sanitation, hygiene behaviour and agriculture, and their implications on health and nutrition outcomes. Usman showed excellent qualities for advanced work and analytical skills that underpin high-quality research outputs. He has published his work in various peer-reviewed journals such as The Journal of Development Studies, Journal of water and Health, and Food Security. He has strong quantitative and applied microeconometrics skills that can be applied to a broad range of real world problems.
