

EXPRESSION OF INTEREST

Global Development Network Doing Research: Assessing Social Science Research Systems

All Expressions of Interest must use this template. The guidelines to fill it are as follows:

- Applicants must indicate in the table below, the institution where the research team is based, and the name and contact details of the Principal Investigator and the team members.
- All sections of this template must be completed.
- The entire EOI (excluding this cover page) should not exceed five pages.
- A letter of support from the applying institution must be provided in annex. It should be uploaded in the relevant section of the online application form.
- The document should be A4 page formatting, 11-point font, Calibri, with one-inch margins.
- EOIs can be submitted in English or in French.

Questions or clarifications can be addressed to the Doing Research program team at dfussy@gn.int and copied to doingresearch@gn.int

Once the EOI is fully completed, please submit it in .doc or .pdf format by email to dfussy@gn.int and copied to doingresearch@gn.int

Submitted by:

Name of the research institution	Country of legal registration

Research team:

	Names of the Researchers	Research Discipline
Principal Investigator		
Member 1		
Member 2		
Member 3		
Etc ...		

Section 1: Details of the Research Team

Summary of the team's research expertise

Brief narrative of the researchers' relevant individual expertise, listing relevant previous activities and describing the complementarity between team members.

Research institution

Description of the applying institution and its current research and programs. Please mention any relevant aspect that the institution could bring to support the project implementation.

Section 2: The Doing Research program

Motivations

Formulation of your interest for becoming the national focal point of the Doing Research program.

Proposed methodology

After reviewing the program documents, please describe your main strengths and weaknesses to implement the proposed methodology.¹

¹ Available at www.gdn.int/doing-research-assessment

Section 3: Experience

Relevant research and project experience

Describe briefly the team's experience in studying organizational and institutional processes in the sector of research, higher education, knowledge and innovation.

Section 4: Capacity and skills

Data collection skills

Describe the team's skills in both primary and secondary data collection, both quantitative and qualitative.

Outreach and networking

Describe how the applying institution can support the dissemination of project outputs through its network, with respect to the team members' connection to key stakeholders in your local research environment.

Section 5: References

References

Please list any relevant research or project implemented by the research team or the applying institution, referenced in the sections 1 to 4, and including links to access them online.
